

Annual NJAE Fall Conference presented as a Free Webinar

October 25, 2020

Sunday

12pm EST ... 9am PST

*2hrs of ADA CERP approved CE credits

Jointly presented by NJAE & the Biolase, Company

The Speaker:

Dr. Charles T. Maupin - Lubbock, TX

Course Title: Laser Activated Irrigation: Does it Work?

Learning Objectives

1. The benefits of cavitation streaming for canal disinfection
2. How to take advantage of the laser for minimally invasive endodontics
3. The importance of incorporating technology with multi-functional capabilities
4. Show how the laser is safe, efficient and effective

Course Synopsis:

The New Jersey Endodontic Association Annual Winter Symposium introduced the concept of minimally invasive endodontics 13 years ago. It is now well accepted that conservation of tooth structure during endodontic therapy is paramount in retaining the structural integrity of endodontically treated teeth. As we have accepted the challenge to reduce the endodontic access cavity and canal shapes, the question of adequate canal debridement and disinfection has become a significant consideration. The inadequacies of canal disinfection from traditional needle irrigation are well known. This webinar will address how incorporation of the laser accomplishes our goals for canal debridement and canal disinfection through minimally invasive endodontic access preparations and canal shapes. The ergonomic flow and multifunctional capabilities(endo, perio, implants, soft tissue, hard tissue) of the laser make this an ideal technology for the endodontist.

Dr. Maupin and 1 or more endodontic colleagues will provide a live 30-minute Q & A session at the end of his recorded presentations. The first 45 minutes will be entirely didactic in nature. The second 45-minute presentation will be a recorded and appropriately edited video of the treatment of a patient in Dr. Maupin's office employing the Biolase laser during the endodontic procedure. Each of the 2 45-minute sessions will have 5-minute breaks to allow our participants to refresh themselves. To attend and participate in this CE event you can link to the New Jersey Association of Endodontists website link which will be tied into the **Biolase Company's** Cvent registration and certification program app. This streaming webinar is provided gratis for all who wish to attend this offering. To obtain a certificate of participation an attendee must complete a brief survey provided on our website at the end of the program. NJAE looks forward to our joint venture with Biolase in bringing you outstanding and compelling continuing endodontic educational opportunities. More information on registration can be obtained on NJAE's website (njendo.org) next week. Biolase will also be sending out an e-flyer with instructions on how to participate on this webinar.

* The New Jersey Association of Endodontists is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Concerns or complaints about a CE provider may be directed to ADA CERP at www.ada.org/goto/cecp
